Discloser

Items must withstand 400 degrees (Fahrenheit) "cure temperature". You must remove brake pads, pistons, seals, sensors or any other component attached. This helps us and helps you to avoid any damage during transit and process on components.

Extra charges may apply for parts in need of disassembling /or assembly, before and after coating process. Components will be exposed to media blasting and degreaser as "Preparation" to remove any contaminants that may affect the quality of finishing and promoting a long-lasting protection (Processes included on the price). Customer acknowledges the existence of risk of damage during the whole process and releases "Forever Coating" from any liability. "Forever coating" uses the FIFO method (First in/First Out).

Turnaround times change often, and we do our best to represent an accurate time frame. The customer agrees with all the information stated above.

Sign: _____ Date: _____

Waiver of liability form.

I (Customer Name) _____, acknowledge that I have read the terms and conditions of service stated on the website and Mail order form from “Forever Coating” and agree with them.

I understand that the services provided by “Forever Coating” may affect the reliability and operation of some parts. I’m aware that it is my responsibility to have the parts inspected by a qualified individual prior to placing the part(s) back into service, since our service is only cosmetic. I’m aware of all steps required for preparation, cleaning and curing for proper appearance. By placing the part(s) back into service, I agree to remove any responsibility to “Forever Coating” from any claim, action, liability, loss or suit arising from the installation and/or subsequent use of said part(s). In the rare case of a component(s) results damaged by the contract labor, all claims will be handled between the contractor and customer directly. “Forever Coating” won’t take any responsibility for damage caused by preparation or coating process, since it’s required to guarantee desired results.
